

## NOMENCLATURE COMMITTEE FOR FUNGI

CF Letter 2: Unofficial

6 September, 2005

page 1

Dear Fellow CF members,

On a lighter (and completely non-official) note, those interested in viewing photos of Vienna and mycologists at the Nomenclature Section may be interested in viewing the photoset posted on

[www.flickr.com/photos/phaeogal/sets/798493/](http://www.flickr.com/photos/phaeogal/sets/798493/)

The slide-show does not provide the running commentary for each slide but gives only the main title and explanation. If you wish to view the commentary for each photo, first click on the uppermost left thumb-nail photo to the right of the main photo.

You can then work through the set by clicking the Next --> arrow to the right of the selected photo.

All are welcome to download photos by clicking on the pale gray 'all sizes' above the photo and selecting the appropriately sized file for the task. Five photos from the official CD [taken by Congress photographer, Rudolf Hromniak] given to those who attended the meetings are also included. All others were taken by me.

It has been brought to my attention that the date in the first paragraph of the report is erroneously reported as "June" instead of the proper July. My apologies; I had already corrected it once in a report sent to the MSA Newsletter that will appear in November and did not double-check the date in our own committee report, which has now been corrected. Those who wish to receive a corrected report may contact me.

Best regards,

Lorelei
